

Pattern Update PQD-159 Tidal Totes

This update only applies to date code of 9/08 or earlier; updates have been made to patterns with date code of 1/09 or later. Date code is located in lower left hand corner of Back Cover, beside the pattern number.

Every effort has been made to ensure that you receive an accurate pattern; when errors do occur, we will provide an update as soon as possible.

Page 3, After you have completed machine quilting and cutting apart your pieces, you will need to adjust lining sizes as follows:

Add: Adjust Lining for your Quilting

1. Now that the outer sections of your tote have been quilted, the lining sizes must be customized. Measure the width of the front/back sections, and correct the width of the corresponding lining piece by cutting to that measurement. Measure the width of the outer sides and again correct the widths.

Continue on with the pattern at the “Prepare Bottom” paragraph.

Page 4, step 8 should read:

8. Sew inner pockets to right sides of 10 ½” x 10 ½” tote lining front and back. Adjust the width of the pockets to match the width of the section if required.

Optional: Stitch compartments in pocket by sewing from top to bottom of pocket as shown.

Page 4, Add step at end of “*Optional - Make your own piping*” instructions:

7. Using sharp scissors, trim raw edges to 1/4” of stitching.
